PROJECTS

SKYFLY

Flight Data App

Skyfly maps all current flights around the world in real-time, providing flight details such as aircraft, flight number, speed, and elevation.

Technologies used - Materialize CSS, jQuery, AJAX, API Integration

FRESH

Ski Resort Info App

Fresh is a full-stack ski resort app that displays up-to-date info on snowfall, open trails, and weather for Colorado resorts.

Technologies used - Knex.js, Cheerio.js, OAuth, AJAX, API Integration

GRATUNE

Free Music Venues App

Gratune is a full-stack iPhone app that targets the free live music venues around Denver. It allows venues to post upcoming events so fans can stay updated on everything going on.

Technologies used - React Native, MongoDB, Node, JavaScript

FLYWAY

Nonstop Flights App

Flyway is a full-stack app that visualizes all nonstop flights from any airport of your choice and provides an updated list of scheduled, current, or landed flights per destination airport.

Technologies used - React, PostgreSQL, Node, Semantic-UI, Leaflet
